

VA30S glass rotameter are the new products of our company.compared with the other domestic products of the same type,it has advantages of high measuring precision, good interchangeability,multiple connection ways,especially the value of flow rate of the flow meter is in millimeter scale mark,which is capable of providing actual flow scale according to the temperature,presure,density, and viscosity of different flows, solving the problem of indication correction. As for the ways of connection. The loose flange structure is available, with both conventional type and corrosion-proof type.

**Specifications**
